CAREER SUMMARY

Software Engineering (Honours) student majoring in smart technologies at the University of Adelaide with strong problem-solving skills and a passion for creative, logic-based approaches to technical challenges. Proficient in Python, Dart/Flutter, C/C++, Web Development, and embedded systems, with hands-on experience in game development, data analysis, and real-time applications. Committed to continuous learning and practical application of software solutions to real-world problems. A strong communicator and effective collaborator in team environments, boasting fluency in English, Arabic and Japanese. I also like bookbinding.

EDUCATION

Bachelor of Software Engineering (Honours), University of Adelaide
(2023 – Present) [Expected to graduate mid 2027]

EXPERIENCE

Part-Time Software Developer, Robinson Aerospace Systems
(Nov2024 - Sep 2025)

- Significantly contributed to the development of RASCube's satellite UI using Dart and Flutter.
- Implemented real-time satellite tracking map functionality and dynamic, openable, and reorderable data windows.
- Played a key role in building a global satellite map system, visualizing status with time-based markers, and clusters.

Academic & Personal Projects, University of Adelaide
(2023 - Present)

- Created several games (Space Invaders, Tank Battle, Platformer) using Python and Pygame.
- Visualized Fibonacci sequences and mathematical concepts using Python's Turtle library.
- Built an Android location app in Flutter that uses live GPS coordinates with Google Maps integration.
- Simulated gravitational interactions in 3D using MATLAB.
- Debugged STM32 microcontroller projects using CubeIDE and onboard debugger tools.
- Collaborated on a full-stack website for managing volunteer events, including RSVP and user profiles.
- Delivered a team presentation on agile methodology in large-scale software systems.
- Set up a remote workflow for coding from iPad using SSH and a mesh VPN to access a PC running Ubuntu Server.
- Created Portfolio website in HTML5, CSS and, JS with animations and language switching.

TECHNICAL/CONVERSATIONAL SKILLS

Languages: C, C++, Python, JS, HTML, CSS,
Frameworks & Tools: Flutter, GameMaker Studio 2, STM32 Cube IDE, Git, Visual Studio Code, Highly proficient in Vim
Platforms: Ubuntu Linux (WSL) (only uses Ubuntu for personal computer), Arduino, STM32 MCUs
Key Concepts: Object-Oriented Programming, Embedded Systems, Game Development, Data Analysis
Other Tools: Git Bash, tig, version control workflows, SSH, Mesh VPNs
Spoken Languages: English (Fluent), Japanese (Fluent), Arabic (Fluent), Chinese (Beginner)
Soft Skills: Public Speaking, Team Work, File & Project Organization, works very well under pressure, challenge seeker

EXTRACURRICULAR ACTIVITIES

Member - Adelaide University Computer Science Club (2023 - Present)

- Supported first-year students with programming projects and game development.
- Attended networking events with industry professionals.

Member - Adelaide University and South Australia University Japanese Clubs (2024 - Present)

- Reached intermediate conversational fluency through consistent participation.

Member – Adelaide University Chinese Club (2026 – Present)

- Learned Chinese from the natives that visit the club.
